

The essence of project celestial

The essence of project Celestial is to open a door in the heart of each being that will never be closed and which will eventually help us to perceive the true reality of our being life and understanding what it's designs are; the gate way to the Celestial life of truth understanding the fundamentality and roles of good Spirituality by observing the guidance and ethics we have received from God through the phenomenal Messianic prophet Yeashua; and renouncing the artificial worldly living which in nowadays is being the source of destruction and problematic to human psychological and social wellness, Spiritual faith life, humanity and creations in general. The scope of my search and dedication has lead me through this open door for more learnings beyond a comfort zone I would have had in any religion. This mystical call is in faith to God the LORD Almighty creator and king of the universe; to stay being responsible and in awareness of our living environment through a conscious living and sharing an intimate concern towards our life and its relation is a human pure design from the Creator (God), one will be fulfilling it to the task he/she has been given and granted to be the just and fair to aspects and elements of life to live in harmony as God is also needing the harmony to be achieved the LORD will increase our perceptions in realizing his kingdom(Heaven) here on Earth.

Stage

Among the 'Seven Gardens' I have been given to nurture in dedication to serve God the LORD Almighty, 'Project Celestial' has been among the projects which has been struggling and been encountered with drastic challenges more often due to premature judgement, acute involvement of organizations and sectors to dictate its fate in to their world of politics and religion which often has nullified the roles and ethics learned from the guidance of God and the prophets have taught laying their life in testimony of the truth they have witnessed that, God is the supreme and the exalted Creator and source of life no knowledge of his creation would be able to substitute nor surpass, rather we are to learn from in a humble purity without abusing the divine knowledge which has been paved for us to propagate through by Loving one another. And when this divine knowledge is applied purely, beings are to orient themselves and their ways of life towards purity and harmony perceiving the celestial aspects of their lives and life supporting environment (nature) as the phenomenal Messianic prophet Yeashua have taught about.

The repulsive responses from organizations and individual who thinks it's not an individual capability for beings to be in relation with in the universe and his Creator God, they have been trying to outline as if such connection and concern should only be belonging to politics and religions while an individual human being have already been created with the freewill of a choice to do good or evil. And the good seeds are such of these, once it is planted it will grow big and the birds will be coming to perch on it later.

Beside from being a pure hope and path as Yeashua had that it can also be made understandable for the current being life for all to perceive and applied it as well, the essence of the project and its scopes have hardly been understood by few people that it's a healing instrument when the intentions are not misperceived due to the learned insanities of this world which has become more devious and tricky for the current human life preventing him/her from being able to understand with clarity that our degree of perception will certainly be depending on our efforts to perceive and to the frequent meditations of our conscious living through the path we can make ourselves to perceive the kingdom of God(Heaven) our Messianic teacher(life example/avatar) have taught us purely.

Based on human history we can learn either of this two variables of the human system failing from providing a peaceful path towards attaining the karma free human system which has a lot to improve and purify themselves as God is pure and clear in his design for beings to perceive and attain the good and kind the LORD have bestowed a perception which will initiate and stimulate their Soul in purity to perceive the kingdom of God (Heaven) where their true design belongs and was residing. This is an individual journey in to the enlightenment sharing the good and kind fruits of our perception where each of our lives will be polished as our life is not separate but distinct and unique which needs to be harmonized in this journey by sharing the light openly and freely as it has been done for us by the teacher to follow the path.

With profound respect and mindful gratitude!

Sincerely,

Agegnehu Tadesse
